

Emergency Department Information

Hospital Knowledge Base • Dummy Educational Data

Overview

The Emergency Department is designed to assess and manage patients with acute illnesses and injuries.

Main Areas

Emergency Reception, Triage Area, Examination Rooms, Resuscitation Area, Observation Area, and supporting diagnostic services.

General Workflow

Patient Arrival → Registration → Triage → Medical Assessment → Testing/Treatment → Observation, Admission, Referral, or Discharge.

Triage

Triage helps healthcare staff identify how urgently each patient needs assessment. Patients with more urgent conditions may be assessed before patients with less urgent conditions.
